Small Mammals Scavenger Hunt at the Smithsonian National Zoo

As you sing and play along with our friends and the small mammals, be on the lookout for three exciting and unexpected moments recorded of our animal friends, Manny the Tamandua, and Sherman the Armadillo. (Scientists call this *observation*.)

- Did you see Manny lose his balance?
- Did you watch Sherman take a giant leap for his toy?
- Did you spy two Naked Mole Rats making a special appearance?

Great job, scientists! What e/se did you observe?
